EVOjack

the ultra-fast jack for rally professionals

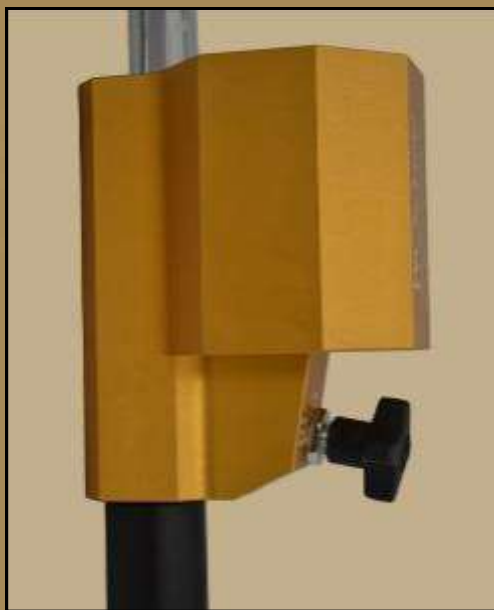

EVOjack is the hydraulic ultra-fast rally jack, specifically designed for the on-board equipment of the best rally cars.

All the critical parts of EVOjack are forged from high-strength steel, or CNC machined from one solid block of aeronautic aluminum alloy for guaranteed reliability.

The fast-drop hydraulic valve eases the release of the jack, while the steel pin height is easy to register accordingly to the car ride and its diameter can be selected from a choice of 21, 23, 25 or 27 mm; an extra hexagonal pin, ideal for gravel rally, is available on request.

Evojack is a professional motor-sport tool to be used by skilled rally crews on emergency tyre changes or tyre swaps between stages.

TECHNICAL FEATURES

Base	adjustable aluminum foot, fully machined from a solid block
Weight	3.89 kg
Lifting speed	8 strokes to maximum height
Lifting weight	600 kg
Minimum setup height	10.5 cm
Maximum setup height	41 cm
Extension	32 cm
Total length when closed	61 cm
Pin	<ul style="list-style-type: none"> • 21, 23, 25 or 27 mm • steel made pin • hexagonal CH 17 on request
