DAKAR *Zero*

rock solid aluminum

DakarZero is the low offset version of the DakarCorse wheel, dedicated to extreme off-road.

The **spokes internal to the tire edge** – with the profile falling towards the hub – allow to have a **negative ET** and protect the mechanical parts from stone chipping and sand. Moreover the **powder coating in three layers** ensures high wear resistance giving the wheel a good appearance even after a probing race.

DakarZero is **available in 15", 16" and 17"** with 4, 5, 6 or 8 holes and unordinary bolt patterns.
